Good morning Shirley,

Reading the request in its entirety just reaffirms that we don't really have the information that they are looking for - at least not in Information Mgmt. Saw in the request that there was a Gulf of Mexico Program Office and wondering what type of information they may have and if future inquiries on wells - depending

on their location - should go to them. Just a thought...

History: This message has been replied to.

In addition to the narrative, we can confirm the existence of the well and the fact that it was issued a temporary offshore EPAA ID number for the management of hazardous waste on 5/17/2000. The ID number is F4P660001077. Nothing else available from 6PD.

EPA does not normally administer the Clean Air Act (CAA) in the Gulf of Mexico west of longitude 80 degrees 30 minutes; The Bureau of Ocean Energy Management, Regulation and Enforcement (BOEM); formerly Minerals Management Service, is responsible for regulating Ooutre Continental Shelf (OCS) sources in that area pursuant to CAA Section 328. BOEM's web site is: http://www.boemre.gov/ We also recommend checking with the Gulf of Mexico Program.
