Subject few more questions regarding your 3007 letter response
Distribution List <crplating@nckcn.com>

Mr. Cline,

The Environmental Protection Agency requests verification on answers submitted by you on June 16, 2006 in response to EPA's request for information (dated June 1, 2006), and the letter sent by you to EPA on February 20, 2006. Please answer each question separately, and provide full, truthful, and complete answers.

1. Please supplement the answer you submitted to EPA regarding your June 1, 2006 response to question 4 (1) & (2). Please describe in detail, when is or at what point is the caustic soda tank sludge and muratic acid tank sludge generated, prior to treatment in the wastewater treatment system? Please describe in detail, the step-by-step process of how the caustic soda tank sludge and muratic acid tank sludge are "treated by the on-site waste treatment system." Also describe in detail, the step-by-step process of what happens to the sludge after it is treated. Include in your answer how, where, and how frequently it is disposed.

2. Please review your June 1, 2006 response to question 4 (1) & (2), and the letter you sent to EPA on February 20, 2006. Please explain in detail: a) the discrepancy between your responses on how the caustic soda tank sludge and the muratic acid tank sludge are managed, b) which process is currently being implemented at your facility, and c) when that process was established and implemented.

Please respond by e-mail by **5:00 p.m. Thursday, July 20, 2006.** Thank you for your cooperation.

Sincerely,
Kori
