SUBJECT

Richardson Flat & Silver Creek Tailings.

SUMMARY OF COMMUNICATION

Ms. Gomes began by asking some questions about an expired NPDES permit for a site adjacent to Prospector Square. the permit was supposedly issued for an inactive mine owned by United Park City Mines. Only later in the conversation did she identify the site in question as Richardson Flat.

I explained that a PA/SI had been done at the site & that in preparation for an HRS scoring package EPA had conducted additional air monitoring. I mentioned that a draft report of the analytical results was now in & she asked about obtaining a copy. I stated that the report was still draft & EPA did not release draft reports, but when it was finalized that she could obtain a copy.

Ms. Gomes asked about 'different treatment of the Richardson Flat & Silver Creek tailings sites by EPA'; why air monitoring was done at one site & not the other; and asked about Hugh Kaye's comments on Park City-Silver Creek. She also expressed the opinion

CONCLUSIONS, ACTION TAKEN OR REQUIRED

that air quality was the major issue at Silver Creek site & yet EPA had not bothered to do any air monitoring. I did not respond to any of her comments/questions but indicated that on Richardson Flat - she could send us a letter requesting any available info. on the site - i.e. PA, SI, analytical results etc.

She indicated that she would send a letter requesting info on RF.
