Agenda for today's discussion:

1. Update on 12/15 OAR Informational Briefing with the Administrator

a. Path forward - dual-tracked 'technical' and 'policy' reconsideration rulemakings

b. Aggressive schedule for both – anticipate 'technical' proposal in Spring 2018 and 'policy' proposal in Summer 2018.

2. Request workgroup to waive Analytical Blueprint for technical proposal (SAN 5719.8)

Rationale: The EPA is working on an expedited schedule to propose the rule titled, "Oil and Natural Gas Sector: Emission Standards for New, Reconstructed, and Modified Sources Reconsideration", Tier 2, 5719.8 in accordance with the President's Executive Order issued on March 28, 2017, and focused on national energy independence, economic growth, and the rule of law. The goal of that Executive Order is to facilitate development of U.S. energy resources – including oil and natural gas – and to reduce regulatory burdens associated with development of those resources. Because this NPRM is a reconsideration of the final June 3, 2016, final rule at 40 CFR part 60 subpart OOOOa, we do not think that an analytical blueprint would add value to

Ex. 5 Deliberative Process (DP)

that any additional analytical blueprint would be duplicative and unnecessary given the aggressive NPRM schedule.

Workgroup Instructions: Pending your agreement, we ask that each workgroup member fill out the expedited waiver poll by COB 1/10/2018:
http://intranet.epa.gov/actiondp/documents/workgrouppollform_2015-10-19.pdf
Note: If you've already submitted your approval, no need to resubmit.

Bi-weekly check-in meeting for SAN 5719.8 "Oil and Natural Gas Sector: Emission Standards for New, Reconstructed and Modified Sources Reconsideration". Materials / agendas will be sent out prior to each meeting.
