Subject: Arkema - Gray Smoke Visible

Below is information reported from the TCEQ Emergency Response Coordinator on scene at Harvey/Arkema Command Post.

As of ~2:10 p.m. today, visible gray smoke is coming from the Arkema Crosby Plant.

Infrared video from the ~1:30 p.m. flyover (ASPECT) depicted 1 of the 6 (remaining) organic peroxide trailers with hot spots. A yellow residue is under all 6 of the remaining trailers. Source of residue is unconfirmed, but believed (by personnel in the command post) to be the from the trailers. The infrared camera noted the yellow residue as hot. Arkema personnel are working to determine material makeup, bringing additional technical staff to the command, and also engaging offsite technical staff.

Ashley
