AR0119

Subject: Montrose

From: Severino
TO: Takata

I. HQ Comments

- restrict access (OK - can provide with stakes & rope)
- include air monitoring (OK)
- excavate off site to background (off site excavation to background appears to be more justifiable than 100 ppm or any other value. HQ staff is not firm on this point, but I am convinced that it is what we should go public with)
- integrity of cap - if uncertain then extremely high concentrations should be removed. (revised capping plan, maintenance plan and deed restriction should eleviate concern - no revisions)
- excavate contaminated sediment from earthen dike, Farmers Bros catch basin, Domminguez Channel, Torrance lateral etc. (we are planning on requiring that the dike and catchbasin be excavated at the completion of ~~implementation~~ construction of the remedial measures. However, we should not go beyond this point because it is not reasonable and could cause worse w/q problem by disrupting.)

REMARKS

Montrose

The report is being finalized and should be ready to distribute for public comment by Fri 11/4.

Do you think we should have a public meeting. DOAS is planning a meeting on Cadillac Fairview for mid Nov.

DO NOT use this form as a RECORD of approvals, concurrences, disposals, clearances, and similar actions
