FYI.....I'll be going, but didn't know if you also wished to go. I'm also trying to get Shaun to give us a tour of the vessel this week. Will let you know.

Thanks Greg.
We are currently planning the meeting for this Friday, noon to 1330, here at EPA. We're at 1200 6th Ave, Seattle (at the intersection of 6th and Seneca). There is parking under the building (we can't validate parking), on the street, and 1 block east, across I-5 on Seneca. Please go to our Public Center on the 12th floor and they will issue temporary badges and phone me to pick you up. Here's my cell number in case you get lost, run late, or have any questions ...(206) 605.6635.
Thanks,
Chris.

Chris D. Field, Manager,
EPA Emergency Response Program, R-10.

Good morning,

Per our discussions at the RRT meeting, I've made my travel arrangements to be in Seattle for the meeting on the 12th.

Please advise on exact time and place.

Regards,

Greg

Chris- I suggested to Richard that we have the formal meeting on the 12th, late morning. Captain Myer is in Seattle for another function that afternoon so having the meeting around 1030/1100 would work best. I got an email from Richard yesterday afternoon that he is in Texas for a family emergency so maybe there is someone else that can arrange this meeting to occur at the EPA on the 12th.

Thanks Greg,
It probably wouldn't hurt for us to sit down for a few minutes and briefly discuss next steps, as long as Capt Myer is available. EPA OSC Rich Franklin is my point person on this issue and he won't be at the RRT meeting, but he is working on setting up a meeting for sometime in the next couple of weeks to put our collective heads together and figure out the best way forward. We could discuss at end of day Weds or over

lunch on Thurs?
Thanks,
Chris.

Chris and Scott,

As we discussed last week during the ESF-10 Seminar in Seattle, I am attending the RRT meeting in Oak Harbor this week as part of my normal annual NPFC Case Management Division outreach program.

If you would like to have a meeting or discussions regarding funding and the current cost recovery efforts on the LST-1166, I think this would be a great opportunity since many of the key people will be in Oak Harbor. Even if it is just a "preliminary" or "scoping" or "informal" meeting in preparation for something a little more formal between the CG and EPA in the near future, I think it would be a worthwhile use of our time to talk about the project.

(By the way, I will make myself available for *any* upcoming LST-1166 meetings if you would like me there.)

regards,

Greg
