Subject: Stauffer Chem Co., Little Rock, Ark
RCRA Inspection.

Subject facility was inspected by S.C. Yen on 2/13/80. The APPARENT SERIOUSNESS OF PROBLEM was rated as "NONE".

SUPERFUND FILE
APR 17 1992
REORGANIZED

Considering that "SEVIN" insecticide was buried on site + subsequently covered with a concrete slab for a building, the area should still be considered as a potential future hazard at the least.

~~On~~ This agency should not consider that this material is adequately deposed of and forgotten. For example, once the present facility ~~is~~ has served its purpose it may be destroyed. ~~so~~ The soil could then be excavated for ~~future~~ other use. This could present a hazard at that time.
