Subject: FW: Unvalidated Data for Lane Plating Works Project
Attachments: Case #48266_SDG_MF9L00.xls

Importance: High

Unvalidated data for Lane Plating. This is an FYI. I will forward these to the team as they come in.

Some additional site update information for the Lane Plating Team.

I am working on the task order for phase 2 sampling. My goal, if we have enough time and budget, is to finish the risk assessments and the RI report before the RACS contract ends in Aug 2020. The FS will probably have to be done under the new RAF system and we may have a 6 month pause as the EPA figures out how to do contracts under the new system. That is why we need to do everything we can under the current system.

The removal people are currently working on the fence and the sign. It will probably be done next week.

Ed is working on the CAG, but this has been delayed by a runoff election for one of the city council seats. We are also working on setting up a community program called the CUPP program with Paul Quin college.

We are considering the need for another community meeting in late July. We were going to do this in June, but it will take longer to get data from the lab than we anticipated. I will keep everyone informed as we get more information. If you plan on attending the meeting, and you have a schedule conflict in late July, please let me know.

One other update for Rebecca and Jessica that is not site related. We are moving to the new building on June 14. Our new address and mail code is in the signature block below.
