E. RATIONALE FOR FINAL STRATEGY DETERMINATION: Miller Flying Service is an inactive aerial applicator. No major problems were identified during the site inspection. Some empty tanks and containers were located at the site and strong pesticide odors were associated with an area of stressed vegetation. However, no contamination was detected in a drainage ditch near the area of stressed vegetation. Also, groundwater is not used in the vicinity. Therefore, no further action under CERCLA is recommended. An aboveground fuel storage tank is apparently still in use at the site and this site notification will be re-analyzed to the Texas Water Commission.
