From: "Brattin, Bill" <brattin@srcinc.com>
To:

Here are 3 different runs:
1 = based on C
2 = based on CE
3 = based on CE*L
For each run, the data were analyzed without stratification and with stratification based on latency (2 bins; < 35 vs > 35)
Also attached is a summary
I think we should talk about whether it is or is not a good idea to stratify by latency (think not, but am not sure).
