Subject: RE: Lane Plating Draft Final SAP - TCEQ review status

Kenneth – I've asked for an update from our management on their review status. I'm hoping to get something to you as soon as possible.

Thanks

Kenneth,

I wanted to let you know that Superfund and eco final comments to the SAP are in review with management and we are hoping to get these to you as soon as possible. Currently no responses are requested to the tentative final comments from Superfund and eco. I am still waiting to hear from our Toxicology staff as they were out of the office last week. I am planning to touch base with them in the next day or so. If needed, we will submit their final comments separately.

Let me know if you have any questions.

Rebecca

Subject: RE: Lane Plating Draft Final SAP - TCEQ review time status

Kenneth,

I found out that our toxicology people are out this week and will not be able to look at the revised SAP until start of next week. I wanted to make you aware of this as it has the potential to delay our comments. However, I am planning to review their comments as part of my review and check-in with them as soon as I can next week. I don't anticipate receiving significant comments from them that would affect phase 1 sampling. Additionally, we can provide their comments separately from the Superfund/eco comments, if needed.

I will update you on the status of this by early next week.

Thanks,
Rebecca

Kenneth,

I realize the answer is likely as soon as possible, but is there a specific deadline for this? I am sending this to my eco and toxicology reviewers and will need to coordinate with upper management on final comments, so an actual due date is requested.

Rebecca

Subject: FW: Lane Plating Draft Final SAP

Lane Plating Team,

We just received the Draft Final version of the SAP and the Final CSMTM for lane Plating. I am hoping to finalize the SAP as soon as possible. Please look at the Track Changes version and me know if you have any significant comments. Doing another revision of the SAP would take at least a week and I am trying to stay on schedule to do field work in May. Please limit your comments to significant issues that must be addressed in phase one sampling. We will do additional sampling in phase 2 and we can probably fix any data gaps at that time.

I will sent the CSMTM in a separate email.

Subject: Lane Plating Draft Final SAP

Mr. Shewmake:

Please find attached a copy of the Draft Final Sampling and Analysis Plan. As we discussed, I have also attached a copy of the text in MS Word, which is in track changes format. For ease of finding the Response to Comments included in the SAP, I also included a copy as an attachment.

Please let me know if you have questions and/or comments.

Thank You,
Mark Paddack
