I don't know of any sample locations that were shifted more than a few feet. I could request a field log if you really want one. I'm going to treat these reports as preliminary, and not try to do a lot of analysis till we get more information.

I'm almost done with the phase 2 task order documents. I should have more information on schedule, budget, and public meetings next week. Give me a call if you want to talk about this.

Thanks for the update Kenneth,

Regarding the upcoming meeting, I will be on vacation July 1st through 10th, and I'm taking a half day on July 19th. As much advanced notice as possible would be appreciated for any documents TCEQ may need to provide comments on leading up to the meeting.

Do you know if proposed sample locations shifted much during the RI sampling, and when updated sample location maps will be available for us to refer to when reviewing the preliminary data?

Thanks,
Rebecca

Importance: High

Unvalidated data for Lane Plating. This is an FYI. I will forward these to the team as they come in.

Some additional site update information for the Lane Plating Team.

I am working on the task order for phase 2 sampling. My goal, if we have enough time and budget, is to finish the risk assessments and the RI report before the RACS contract ends in Aug 2020. The FS will probably have to be done under the new RAF system and we may have a 6 month pause as the EPA figures out how to do contracts under the new system. That is why we need to do everything we can under the current system.

The removal people are currently working on the fence and the sign. It will probably be done next week.

Ed is working on the CAG, but this has been delayed by a runoff election for one of the city council seats. We are also working on setting up a community program called the CUPP program with Paul Quin college.

We are considering the need for another community meeting in late July. We were going to do this in June, but it will take longer to get data from the lab than we anticipated. I will keep everyone informed as we get more information. If you plan on attending the meeting, and you have a schedule conflict in late July, please let me know.

One other update for Rebecca and Jessica that is not site related. We are moving to the new building on June 14. Our new address and mail code is in the signature block below.
