JAN 21 1994

MEMORANDUM FOR: (b) (6) [redacted]s, NMSS/IMNS

FROM: (b) (6) [redacted], Director
Division of Radiation Safety & Safeguards

SUBJECT: RECORDS RELATED TO CAMP PARKS AND CAMP STONEMAN

Pursuant to discussion between (b) (6) [redacted], RV, and (b) (6) [redacted] EDO, and review of the subject files, Region V has allowed access to and released portions of the Naval Radiological Defense Laboratory (NRDL) files related to Camp Parks. Camp Parks' operation did not involve human research. Interest in the facility is related to questions about its former use and acceptability for release. Nevertheless, because of the extent of media interest, we would appreciate your making the task force on human experimentation aware that we released the Camp Parks files. Also, we are forwarding the attached NRDL documents that do not relate to Camp Parks to you for review by the task force. These documents do contain some information on human research (see page 10 of the NRDL Annual Report and pages 1, 2, 3, and 13 of the Stoneman Report). Please assure the task force is aware of the existence of these records. Further, we request you to coordinate task force approval to release these documents to the public. Please note that pursuant to discussion with (b) (6) [redacted] copies of these documents have been provided to (b) (6) [redacted], DOE, who is responsible for assembly of records related to human experimentation.

(b) (6) [redacted], Director
Division of Radiation Safety &
Safeguards

cc: (b) (6) [redacted], EDO
(b) (6) [redacted]/IMNS
(b) (6) [redacted], RV

Enclosures:
NRDL Materials Licenses Nos. 4-487-2,-4,-5, and -7
Dept. of the Navy ltr., dated 11 April 1958
NRDL Report - Operation Stoneman II
NRDL Annual Progress Report 1959
