Subject: Next Willamette Basin Mercury Variance Meeting - April 4
Attachments: mercury2019acmeeting4Agenda.pdf

Willamette Basin Mercury MDV Advisory Committee:

A reminder that we will be holding our next Advisory Committee on April 4. The meeting will be held at DEQ offices in Room 601 (same room as the last meeting.) The meeting will begin at 9 am and we hope to be done by 12:15. A draft agenda is attached. We have two main topics, separated into three presentations:

1). After getting feedback from committee members and others, we are revising and simplifying the draft "Highest Attainable Condition" procedure in a way that will apply to both municipal and industrial dischargers.
2). In addition, after the last meeting, we thought it would be helpful to describe how we envision the variance process for each facility seeking coverage, including application procedures, variance requirements and periodic re-evaluation of the highest attainable condition.

Please let me know if you have any questions. We'll follow up with additional supporting material next week.

Sincerely,

Aron Borok
