All,

Please find attached the preliminary report for the West Texas Fertilizer fire. We have more information to added concerning the ammonia detection and will include this in a report in the morning.

We have examined all of the data and only detected ammonia in an area 600 to 1000 feet downwind of the fire.

Please let me know if you have any questions. I can be reached at 513-675-4753.

Mark
