Thanks David. You mention the material you will send us. What topics will that cover so that I can include in the agenda. No problem with me generating the agenda…

Jorge

Hi Jorge,

Thanks for the email. I have been able to arrange for an additional 30 minutes and the meeting will run from 9:30 am to 11 am CT-Dallas with our team on March 6. They have requested copies of the materials in advance and no later than noon on March 5. I will make sure that you have any of our materials by the deadline also. Does that sound doable? I can distribute the information to our folks and will rely on you to do the same for Denka's team. Do you want to take the lead on sketching out an agenda? I'd like to share it with the participants also.

Best,
David

David,

Thanks again for agreeing to meet with us next week and for securing the attendance from EPA personnel. We are preparing the material and as I look at it, the attendees, and the time it has been since we have met with EPA I believe we will need 2 hours for this meeting. You mentioned that attendees from DC only have one hour. Do you think they could remain longer or can we continue the meeting after they have left (we would tailor the meeting to present what they most need to see while they are with us)? Going through the data, the progress made, what we know about the offsite numbers, status of PBPK development, efforts with the community, etc. are very good topics for us to update EPA on and to discuss. Thank you David. I look forward to hearing from you…

I can call you later today if that will help.

Jorge
