D. ENFORCEMENT ACTION NEEDED (If yes, specify in Part E whether the case will be primarily managed by the EPA or the State and what type of enforcement action is anticipated.)					

E. RATIONALE FOR DISPOSITION

The site is an inactive cattle feedlot operation which incorporated a cattle dipping unit, live stock pens, a grain silo, runoff collection pond. It was also indicated in the SI that empty pesticide drums were dumped at the site in 1979. Two other locations were also identified in the SI, however, they will be treated as separate sites. The potential source of contamination is from the pesticides. Given the depth to ground water (20-25 ft) and the toxic nature of the pesticides it is recommended that further investigative actions are needed.
