Subject: FW: Follow-up related to PFAS Places of Interest Data Call submissions

Hi Andrew,

Please advise if we can accommodate the request below. If so, please make the change in the tool. If not, please let me know why we can't so that I may get back to the customer.

Thanks,

Alex

Subject: RE: Follow-up related to PFAS Places of Interest Data Call submissions

PFAS Data folks:

It is advised that the "point of interest" for the Chemours site in West Virginia be solely associated with the existing information contained in FRS: https://echo.epa.gov/detailed-facility-report?fid=110000586081

This site is jointly worked on by both Region 3 and Region 5 given its close proximity to the boundary between the two regions. Hopefully on the backend you can assign multiple relationships per "point of interest" so that they will appear based on different filtering options.

- Cary

Subject: FW: Follow-up related to PFAS Places of Interest Data Call submissions

Good Morning Everyone,

I hope you all had a wonderful holiday. ERG reviewed the submissions we've received (Removal Actions, Region 5 and Superfund) and have provided feedback and requested clarifications of some of the information provided. Please see below and provide us with your respective responses/clarifications to PFASData@epa.gov. We want to take this opportunity to thank you again for having responded to our initial request so quickly. You will be cc'd on other communications to the other programs and regions requesting their information. You are included in those emails for information purposes only. Again, please know that we appreciate your response to the our original request for information on Places of Interest. Let me know if you have any questions.

Respectfully,

Alex

Subject: Follow-up related to PFAS Places of Interest Data Call submissions

Attached is a WORD file (and in the email below) with a few follow-up requests for each of the three submitters (NPL, Removal Actions, Region5). We could make these changes, but if the data call is to be a recurring request, it would be best to minimize data processing after programs submit their data.

The Excel sheet is intended to help the NPL and Removal Action programs consolidate two overlapping entries. It is not relevant to Region 5's submittal.

Removal Actions follow-up:

- Please review the hyperlinks in the 12.13.2019 submission; two of the hyperlinks lead to internal sites. Are there publicly accessible URLs for

Bradley International Airport Plane Crash	Windsor Locks	CT
Gailey and Lord Sludge Field	Darlington	SC

- Please coordinate with Superfund NPL program to merge values for two places that are on both Removal Actions and NPL lists:
    - Precision Plating Corp (CTD051316313) and
    - Loring Air Force Base (ME9570024522) sites

  Attached file (PFAS POI Superfund and Removal Actions follow-up.xlsx) contains submissions from both programs for these two sites.

Region 5 follow-up:

- Please provide Ohio-based location information (LATITUDE AND LONGITUDE, and address (Street Address, City, State) for the impact area within Region 5 associated with the Parkersburg, WV Chemours site
    - Region 3 & 5 will both be listed under "Program(s) Affiliated with Record." In the PFAS Data Explorer, we would like to map this place of interest as 2 points and to allow users to filter/retrieve information using either OH (region 5) or WV (Region 3).

Superfund NPL follow-up:

- Please confirm that empty data fields will remain unfilled for this data cycle.

Data Entry Rate for Selected Fields (All other fields are 100% complete)		
Require/Not Required	**Data Field Name**	**% complete**
Required	Public Contact	0%
Required	Phone, email, or url of public contact	0%
	Environmental media where PFAS detected?	92%
	Health Advisory Flag for DW	90%
	Environmental media sampled for PFAS?	56%
	Mitigation of Drinking Water Supplies	28%
	PFAS Chemicals Monitored/ Sampled	0%
	PFAS Chemical(s) Contamination	0%
	Site Remediation/ Controls in Place	0%
	Onsite Sampling	0%
	Offsite Sampling	0%

- Please confirm that the Health Advisory Flag (Column AC) entry containing "Y*" can be standardized to "Y"
- Please coordinate with Removal Actions program to merge values for two places that are on both Removal Actions and NPL lists:
    - Precision Plating Corp (CTD051316313) and
    - Loring Air Force Base (ME9570024522) sites

  Attached file (PFAS POI Superfund and Removal Actions follow-up.xlsx) contains submissions from both programs for these two sites.
- For future submittals, please remove Column T "Superfund Alternative Agreement" (Column T) so that format matches template for data call.
