Importance: High

Yes – we should be clear that **this** 1/22 ECOS presentation by Mike Barrette of OECA is on data sharing efforts between EPA and states, **not** on the release of the PFAS Data Explorer. This is an ongoing dialogue that we have been having with ECOS over several years, and it is discussed in the action plan on page 6 – see below.

Ex. 5 Deliberative Process (DP)

I thought there was another presentation to states or a region that Lisa and Megan Christian were working on, that Jennifer was going to give based on some slides I sent her – for the **ORD** presentation, we should not discuss the data explorer release yet – maybe well have some updates by the end of the week.

Please let me know if any of that is not clear, thanks, Andy

Andy- should they be changing the agenda item to be clear that they won't talk about the data explorer tool since it's not public and the status is unclear? Can you let Lisa know today so she can make sure it gets changed?

Thanks.

Importance: High

I was told that the PFAS Data Explorer has not yet been cleared, and we should hold off from discussing outside of EPA. As of last week, this had not changed.

Subject: Draft ECOS PFAS Call (1/22) Agenda for Review, Materials

Hi all,

Thank you for your willingness to speak on the ECOS PFAS Caucus call next Wednesday, January 22 at 2-3 p.m. Eastern. I've attached a draft agenda. Please review it and let me know if you have any edits or questions by this Thursday, 1/16.

I've set up a webinar. Please let me know if you will have slides or any other materials. I don't actually need the PowerPoints from you until the afternoon before the webinar.

I look forward to talking with you all next week!

Best,
Sarah Grace Longsworth

Outline of Presentations:

1. Sharing "Places of Interest" data
- State example – Michigan: public website showing areas with contamination

- EPA example – "Places of Interest" data model being used in conjunction with National PFAS Data Explorer release

2. Sharing Ambient Monitoring of PFAS (surface water, soil, sediment, biota) via the Water Quality Exchange

- State example – Minnesota, the Water Quality Portal

- EPA example – show some screen captures of what the national data looks like

3. Sharing of Drinking Water Testing Results

- State example- California

- EPA status on being able to receive DW testing data – presentation by SDWIS manager (Michael Plastino) to discuss the upgrades that SDWIS is making to allow data flow for PFAS data.
