Alex,

Thanks for the reminder. The Explorer should definitely be included. Drew would have captured the GeoPFAS effort but not the Qlik. I will take a look at the spreadsheet and see what needs to be done to capture.

Tim

Hi Tim,

I heard about your assignment as Associate Director. Congratulations! I wanted to ensure that this did not fall through the crack and couldn't recall if you had responded. Please see below and let me know if you need OSIM to do anything.

Thanks,

Alex

Hi Tim,

I'm not sure OSIM is the right office to submit anything on this. In short, should CPHEA include the Explorer and Geo work in their response to the call memo? I'm not sure how to fill in or represent our current effort. I looked in RAPID/RMS system and found the following entry. I think Drew may have entered this information in RMS. Let me know if you need more information.

Research Area
Program: SHC Start Date:10/01/2018
Ex. 5 Deliberative Process (DP)
Research Area IRMS ID:SHC19-01.05Date of Approval:
Research Area Title: Chemicals of Immediate Concern
Research Area Coordinator: Cashdollar, Jennifer LStatus: In IOAA Review
Supervisor:(none entered)View Status History
Topics: Contaminated Sites

Ex. 5 Deliberative Process (DP)

Thanks,

Alex

ORD ACTION TRANSMITTAL

Transmittal Subject:	Identification of FY 2020 PFAS Resources
Response Due Date:	01/03/2020
Contact Organization:	ORM

Background Information

In April, 2019, ORM requested PFAS resource levels for FY 2018 and FY 2019. This request followed the finalization of the PFAS Action Plan. Given the heightened awareness and concern about PFAS from the public, media, and Congress, ORM is confident that ORD will receive ongoing requests for information regarding our research efforts.

Analysis

On February 14, 2019, EPA finalized and released its PFAS Action Plan. In April 2019, ORM requested PFAS resource levels for FY 2018 and FY 2019 in preparation for questions from OMB, Congress, and others.

ORM is requesting FY 2020 Operating Plan base resources (dollars and FTE) associated with PFAS research to be tagged in IRMS. This is subject to change after EPA receives an Appropriation. ORM will use also this data to inform the FY 2021 President's Budget submission as well as coming fiscal cycles. When it is appropriate, ORM will asks for updates to this information.

Action/Instruction for Response

Attachment A is the submission from earlier in 2019 completed by the Labs and Centers. Even though the submission is in the old organizational and StRAP structures, it can serve as the foundation for this exercise to identify PFAS resources in IRMS.

Attachment B contains the instructions and template for the National Program Directors and Centers and Offices to complete. NPDs and Center/Offices should work together to submit a complete template. Please create new rows and enter PFAS in Column I (green cells) and fill in the resources that should be tagged as PFAS. Dollars should have separate rows than FTE. The total at the top of the template should not change. In other words, the tagging should result in a net zero change to the budget. We are only requesting Programmatic dollars and FTE at this time.

If there are any questions, please reach out to Maya Pachnowski at (919)541-1090 or Matthew Richards at (202)-875-3381 or via email. Please send your responses to Maya and Matt by COB on Friday, January 3, 2020.
