Waste Minimization Statement

Because of a very depressed business economy Cramer Plating was unable to convert the cyanide plating process over to non-cyanide during the year 2011 as planned, although there was a huge reduction from hexavalent chrome to trivalent chrome usage. Also during the last part of 2011 the lagoon reclamation project was started.

The company feels that this project will be a huge plus in the waste reduction numbers in the future, because with its elimination on site there will be more areas that can be developed with recycling methods available.

David Cramer,
President
