Re: Annual Report of Hazardous Waste Exports for RY 2011

Dear Mr. Small,

The enclosed Annual Report of Hazardous Waste Exports for Reporting Year 2011 is submitted as required by 40 CFR 262.56. This report summarizes the type, quantity, and ultimate destination of the "hazardous waste" exported last year.

The "hazardous waste" in this case is kettle dross, malformed or damaged plates, scrap grid metal, and other lead-bearing scrap from the manufacture of lead-acid batteries sent for reclamation at a permitted facility. Please note that under federal regulations, the referenced material would be exempt from classification as a hazardous waste under 40 CFR 261.2(c)(3), as a material being reclaimed.

Please contact me at richard.kaestner@exide.com or by phone at (479) 649-2178 if you have any questions or need additional information.

Sincerely,

Richard Kaestner
Plant Manager – Exide Fort Smith
