E. RATIONALE FOR FINAL STRATEGY DETERMINATION

FIT found no sign of drums being dumped on the ground at the site. An off site soil sample was taken down gradient of the alleged disposal area. Analyses of the sample showed no elevated levels of inorganics and no significant levels of extractable organics. FIT found the site to be well maintained. The only wastes generated on site comes from the washing of trucks and equipment used in the conditioning of oil wells. Runoff from this area is collected and oils are removed by a separator and disposed by J&R Transport off site.
