Cheryl: here are the maps. Do you need anything else for the utility markout?

Here is information on the groundwater survey Juneau County will be starting in about a couple of weeks.

Sincerely,

Cheryl Burdett

Hi Cheryl,

We are starting to get our groundwater survey started in northern Juneau County, or at least getting the information out. I know when we last talked, you were interested in receiving information on the survey and I am attaching the flyers that are being distributed. We will know in a few weeks how many participants we will have.

Hope all is well.

Hi Matt:

I am available to talk today anytime between 9 am - 4:00 pm or tomorrow or suggest a time to talk.

sincerely,

Cheryl Burdett

Hi Cheryl,

I was contacted by Michelle Scarpace with Wisconsin DNR to reach out to you regarding our proposed groundwater survey. I would be interested in talking to you about your proposed project as well. To provide a brief background on our proposed survey, the Juneau County Land and Water Resources and Health Department are trying to do a joint survey this spring in Armenia township. We are planning to offer a cost share to homeowners to get well water tests run at a certified lab. We are targeting nitrate and chloride tests. In order to get the cost share, the homeowners will have to give us the location of their well in addition to the well depth. Our goal is to map the horizontal extent and depth that potential high nitrates are being found. We are planning to do a follow analysis on some of the "high" samples to look for caffeine and pesticide/herbicide metabolites to better define potential sources. We are going to do a follow up educational program this summer/fall to provide more information to the homeowners. We are aware of the land use in that part of the County and want to use this exercise to draw attention to a potential issue for the local decision makers.

Feel free to contact me anytime.
