Attachments: Comparison of results from private wells Sampled by EPA.xlsx

Hi Pat:

Attached is the comparison table of private homes sampled by EPA in October 2017, May of 2018, and the homes that overlapped with Juneau and Wood Counties sampling event in May of 2018.

Cheryl Burdett

Subject: RE: NE Juneau County (WI) Groundwater Investigation

In response to Mr. Crass's e-mail sent to Charles Mikalian on Wednesday, September 5, 2018.

Of the 6 private homes that exceeded the nitrate MCL in October of 2017, 4 of those homes were part of the Juneau and Wood counties sampling effort in May of 2018. Cheryl Burdett, EPA has reached out to the two other private homeowners and invited them to contact Matt Komiskey, Juneau County Land and Conservation to request bottled water.

Please contact Mr. Matt Komiskey to inquire as to whether or not the two private homeowners from EPA's October 2017 sampling contacted him.

Sincerely,

Cheryl Burdett

Chuck: In the above report released yesterday, EPA reports that it performed a preliminary study of the area in October 2017 by sampling 13 private wells with six of the wells exceeding the nitrate MCL. The data from this preliminary study are not included in the materials. Are you able to produce these results to us or via the County and the NDA? Are these wells within the 104 wells reportedly sampled or are they in addition to? Please advise.

Thank you.
