I would like Robert Thompson, CRL and Dean Maraldo. I will check their availability.

Ok, I'm looking at Thursday 8/2 sometime between 11:30 – 2:30. WDATCP is available, but they have to check with their lab – and can check with their DNR contacts too. Do you want to check availability for anyone else you want to invite? Some of the CRL folks looked available then when I checked calendars the other day…

Yes, I would like to test more wells and yes, I think we still need a meeting.

Sincerely,

Cheryl Burdett

Hi Cheryl,

FYI: Two weeks ago, WDATCP resampled 15 of the highest nitrate concentration wells from the Juneau/Wood sampling work. Those samples are being run by WDATCP's Lab for pesticides and nitrate…the data should be available in a few weeks. If you need a list of those they sampled, they can send it. Not sure if this makes any difference for the WD in your decision to collect more samples, but please advise on whether you wish to test more, and if a meeting is still in order…?

In addition to the questions below:
Do you know about how many samples would be involved?
Will you also invite the DNR folks to any discussions so everyone is in the loop?

Thanks,
Amy

CRL could analyze for pesticides, but their capability is limited. It would be good to discuss options, and how to best proceed to cover any pesticide work.

Just to clarify:
Who has requested the sampling?
Will it include only pesticides or other analytes/chemical parameters?
Who is collecting the samples?
Who is funding the sample collection and analysis?
Is there a timeframe proposed at this point?

Yes, because we may want CRL to analyze samples for pesticides, I think they can do that correct?

Could you include Dean Maraldo in that meeting.

EPA generally doesn't deal with pesticide sampling, but WDATCP has an extensive program. It would be worth having a call with WDATCP, their lab and CRL to discuss further. Do you want me to set something up? What sort of timeframe is being considered?

This was a note to myself, but apparently I sent it to you. I wanted to call you and let you know that Juneau and Wood Counties want to do another round of private well sampling and include pesticide sampling and I thought you may be interested in this.

Hi Cheryl,

Was this meant to be a meeting invitation?

Discuss what EPA may do with pesticides in the area of Juneau and Wood Counties.

Cheryl Burdett
