Subject: Labeling public water ssytems on CSD map

Ryan,

I'm making a map of Central Sands Dairy that includes all of the GIS layers that have been discussed thus far in a single combined map, and I'm think it would be more useful to Cheryl to have the mapped public water systems labeled by name rather than PWSID. But there is a problem in my not having access to SDWIS, I can only come up with PWSIDs. Therefore I need someone who has access to SDWIS to take the attached excel file and enter the associated name in a new column. Can you do this? Should I work with someone in GWDWB? (The attached small handful of PWSIDs are for the nearby community water systems only. The excel file for the non-community water systems will be a much longer list of PWSIDs).

Milo
