Subject: RE: Question about WDTCAP's Data for Juneau and Wood Counties

Hi Stan,

Three more questions:

1) Was this data taken as part of routine sampling? Yes, it was part of our Targeted sampling program. We would not have been in the area until 2019, but due to the township testing that was done, we were asked to test wells for pesticides, and we decided to move it up to this year. In other words, why was this sampling done? DATCP tests private wells in different agricultural areas of the State annually as part of our Targeted Sampling program.
2) Have these residents (both in Juneau and Wood Counties and in the other counties) been notified of the results? YES
3) Does Wisconsin plan to do anything about the results? What are the next steps? The answer to this involves a response from more than this agency. I suggest you arrange a teleconference on this issue with staff from DNR and DATCP, and possibly DHS as well. For DATCP, please work through Mark McColloch and/or Lori Bowman. For DNR, Bruce Rheineck would be a good point of contact. For DHS, Sara Yang or Roy Irving. They have been copied on this message for your convenience.

I will also take this opportunity to answer one of your earlier questions (below) regarding the counties from which the data had been collected. The DATA on the "ARMENIA" tab is just the samples collected in Juneau and Wood Counties, west of the Wis. River. The data in the "All TSAMP 2018" tab includes the Armenia data and all other data we had received up to the time that I sent the spreadsheet. The "All TSAMP 2018" data is from counties including Juneau and

Wood, Portage, Waushara and Adams Counties. Other areas we sampled this year include Dane, Green, Green Lake, Rock, Trempealeau and Dunn Counties. We await receipt of that data.

Thank you,
Jenny

Subject: RE: Question about WDTCAP's Data for Juneau and Wood Counties

Only the "Armenia" tab are the Juneau/Wood county samples. I can provide the counties for the other samples, but will have to do so when I get time. I'm out of the office today...busy wrapping up field work.

Subject: FW: Question about WDTCAP's Data for Juneau and Wood Counties

Hi Stan,

I was wondering if you would be able to provide the information below. My management has a question about it.

Thank you,
Jenny

Subject: RE: Question about WDTCAP's Data for Juneau and Wood Counties

Hi Stan,

I have another question about the attached spreadsheet. I am guessing all of the homes in tab "ALL TSAMP 2018" are not in Juneau and Wood County, right? Are the 15 that are in the "15 Armenia" tab, the only 15 in tab "ALL TSAMP 2018" that are from Juneau and Wood Counties?

Would it be possible to label tab ALL TSAMP 2018 by county? I am curious if you have any from Portage County as well as some other counties.

Thank you,
Jenny

Subject: RE: Question about WDTCAP's Data for Juneau and Wood Counties

Great question. No...the pesticides are in ug/L (ppb), and the nitrate is in mg/L (ppm). Sorry for any confusion on this.

Subject: Question about WDTCAP's Data for Juneau and Wood Counties

Hi Stan,

I am working with Cheryl Burdett on the Juneau and Wood Counties nitrate issues. I am guessing the attached data, for ALL of the contaminants, is in mg/L. May you please verify that. Please copy Cheryl on your reply so she knows, too.

Thank you,
Jenny
