Subject: RE: MBTA CRMF Area Drainage Study Update

Hi Janis,
Thanks for looking into this. I think this is really important.
Cathy

Cathy,
I apologize for the delay in my response.
Let me check with the Green Line Extension Project and see what is currently required of the contractor to deliver when the construction project is complete.
If a drainage study is not included, we can look into either adding it to the contract, or completing one separately.
Let me get back to you.
Thank you,
Janis

Subject: MBTA CRMF Area Drainage Study Update

Dear Janice,
As MassDEP works with EPA on the draft renewal of the MBTA CRMF NPDES permit, we are realizing that there have been (and will be) significant changes to the drainage through the MBTA property due to GLX construction as well as the planned Union Square Redevelopment Project (which, as we understand from the MEPA filing, would send a very large amount of stormwater to the MBTA CRMF outfalls to Millers River).

I have in front of me the February 2011 Area Drainage Study which was prepared as a requirement of the 2007 NPDES permit (MA0003590). I was wondering if MBTA/Keolis is planning on revising this document as a way of keeping track of

changes of flows to the outfalls, and if yes, what the anticipated timeline would be. Obviously we are very interested in this information as we develop the new NPDES permit.

Thanks,
Cathy
