Hi Mike. The EPA Stibnite team would like to talk to you this week, if possible, to talk about a new proposal that we are thinking about for the Stibnite Mine Site. The EPA people who would be participating in the call would be myself, Helen Bottcher (RPM), and Don Clabaugh (hydrogeologist). I have attached a copy of the table that EPA and the other participating parties have developed. The table lists areas of existing contamination that may be good candidates for early actions at the Site. The Forest Service is reviewing the table to see if it is complete, so there may be edits to the document by the end of the week. Our hope is to send the final table to Midas on Monday the 20th along with a new general proposal for settlement. We would appreciate the chance to talk with you to explain the proposal and get your initial thoughts. Please let me know if you have a time that works for you and whether you. Helen Bottcher, EPA's RPM, is also wondering if there is a technical person from the Nez Perce that she can communicate directly with. Thanks very much.

Elizabeth McKenna
