Subject: Sample relocation/disposal request

This email is to notify you that samples from the Materion Brush Facility and US Steel - Minntac Tailing Basin Area Facility projects (CRL Work Orders 1703011, 1709003) are scheduled to be relocated to ambient storage on Friday, May 25 2018. This is a shorter than usual time period for client review due to the upcoming electrical shutdown at CRL over the Memorial Day weekend. The power will be turned off to the building for routine maintenance, and cooler space is at a premium as all refrigerated items have to be moved into the walk-in for the duration of the shutdown. If either of the following apply to you, please respond to me by Wednesday, May 23rd:

a) You no longer require the samples to be kept and would like for them to be disposed, or
b) You would like for the samples to remain in the cooler. In this case, please provide the reason for the samples to remain refrigerated.

Otherwise, if I do not receive a response from you, then I will assume sample relocation is acceptable.

Thanks!

Robert Snyder
