(i) A description of the efforts undertaken during the year to reduce the volume and toxicity of waste generated:

Quantity of high cyanide solutions used on-site was reduced last year through disposal. Changes to the process provided UTAS the opportunity to dispose of excess plating solution maintained on-site. In addition, facility improvements temporarily increased waste this year.

(ii) A description of the changes in volume and toxicity of waste actually achieved during the year in comparison to previous years to the extent such information is available for years prior to 1984:

Volume of waste increased as a result of facility and process improvements/changes. Future quantity of high cyanide material requiring disposal is anticipated to be lower.
