Dear Mr. Angel,

Thank you for the request for an update on the Navy's radiological data evaluation for Tetra Tech work at Hunters Point. As I understand, this update is intended to be read and/or distributed at the June 21 Greenaction meeting. Please see the summary below:

In late 2016, the Navy hired a consortium of experts to review work by its contractor, Tetra Tech EC (TtEC), who admitted to falsification of data. The primary goals of this review are to ensure that the property is safe and identify any issues that need to be resolved for radiological work conducted by TtEC at Hunters Point. There is a tremendous amount of data to analyze. The Navy, our consultants, and the regulatory agencies have committed a great deal of resources to this large project and, at a minimum, meet biweekly to discuss progress.

Our accomplishments to date include:
1. Compiled relevant soil sample data from over 15 years of TtEC radiological work,
2. Confirmed that laboratory data results were entered correctly in our data base, and
3. Developed a process with regulatory agencies for evaluation of soil sample data.

The evaluation of TtEC radiological work is ongoing and expected to be complete in December of 2017. Confirmation sampling or other activities will be recommended as results become available. A community meeting will be held in September 2017 to discuss results. When the date/time/location are finalized, this meeting information will be sent to Greenaction. I encourage you to attend.

For additional questions on general radiation, a technical expert has been hired by the Navy to provide information to the public. Dr. Kathryn Higley is a Professor and Head of the School of Nuclear Science and Engineering in the College of Engineering at Oregon State University. Please feel free to contact her if you have any further questions: phone: (541) 737-0675 or email: Kathryn.higley@oregonstate.edu.

Best Regards,

Derek J. Robinson, PE

Hello Derek,
We look forward to receiving the statement you were to prepare about the status of the Navy project at the Shipyard to be read at tomorrow's Bayview HP EJ Task Force meeting.
Will we get that today so we can be sure to have it in time? Thanks,

Bradley
