SAMPLE RECEIPT:	Samples were received intact, at 3°C, on ice and with chain of custody documentation.
HOLDING TIMES:	All samples were analyzed within prescribed holding times and/or in accordance with the TestAmerica Sample Acceptance Policy unless otherwise noted in the report.
PRESERVATION:	Samples requiring preservation were verified prior to sample analysis.
QA/QC CRITERIA:	All analyses met method criteria, except as noted in the report with data qualifiers. L3-Laboratory Control Sample and/or Laboratory Control Sample Duplicate recovery was above the acceptance limits. Analyte not detected, data not impacted. N1- Hexachlorobutadiene was detected above the MDL in Trip blank sample PVC0465-05 The associated method blank also had a hit above the Reporting Limit for Hexachlorobutadiene. The Hexachlorobutadiene hit in the trip blank and method blank are due to carryover from the QC. The associated samples are all non-detect for Hexachlorobutadiene therefore the data is not impacted. Due to insufficient sample the trip blank will not be re-analyzed. N1a-The MS/MSD RPD exceeded acceptance criteria. See LCS/LCSD RPD.
COMMENTS:	No significant observations were made.
SUBCONTRACTED:	No analyses were subcontracted to an outside laboratory.
ADDITIONAL INFORMATION:	Due to Laboratory oversight PVC0465-02 was not used for the MS/MSD.

SAMPLE RECEIPT:	Samples were received intact, at 2°C, on ice and with chain of custody documentation.
HOLDING TIMES:	All samples were analyzed within prescribed holding times and/or in accordance with the TestAmerica Sample Acceptance Policy unless otherwise noted in the report.
PRESERVATION:	Samples requiring preservation were verified prior to sample analysis.
QA/QC CRITERIA:	All analyses met method criteria, except as noted in the report with data qualifiers. N1 = Hexachlorobutadiene was detected above the MDL in Trip blank sample PVC0524-03. The associated method blank also had a hit above the Reporting Limit for Hexachlorobutadiene. The Hexachlorobutadiene hit in the trip blank and method blank are due to carryover from the QC. The associated samples are all non-detect for Hexachlorobutadiene therefore the data is not impacted. Due to insufficient sample the trip blank will not be re-analyzed. N1a-The MS/MSD RPD exceeded acceptance criteria. See LCS/LCSD RPD. L3-Laboratory Control Sample and/or Laboratory Control Sample Duplicate recovery was above the acceptance limits. Analyte not detected, data not impacted.
COMMENTS:	Results that fall between the MDL and RL are 'E4' flagged.
SUBCONTRACTED:	No analyses were subcontracted to an outside laboratory.
