Hi Phillip: are you still planning to submit the O&M plans for the lagoons and WWTP this week? We may be able to close out the lagoon cases once the plans are submitted and reviewed. For the WWTP, if DO violations are eliminated for a quarter (and no other effluent limit violations) we may be able to close out the WWTP too.

Thanks,
Dean

Dean,

The response is a little more detailed than we talked about today but if any questions please don't hesitate. Thanks

Philip: Hope all is well. Could you please provide an update on areas of concern identified during the May 2016 NPDES inspections at the WWTP, Diaperville, and Birch Hill? I'm attaching a summary table which you may use to provide updates.

Thanks,
Dean

Philip: I've yet to receive the update on the current status of areas of concern identified during EPA's May 2016 inspections. Please submit the update as soon as possible.

Thanks,
Dean

Dean,

I will have a comprehensive update for you in regards to the area of concerns in the report by or before November 12, 2016. I went back to the email received on August 19th 2016 and did not see the expectation of an update in 30 days of receipt of the report. However, I assure you and EPA that I will give you the current status of the areas of concerns.
Thank you Philip

Hello Phillip: In August we provided an inspection report for our May 2016 inspection at the Bad River wastewater facilities. We asked for an update on areas of concern identified during the inspection within 30 days of receipt of the report on August 23, 2016. We have not yet received a response from the Band on the status of the areas of concern. I'm attaching the inspection report for your convenience and ask that the Band provide EPA with an update on areas of concern by November 12, 2016.

Please let me know if you have any questions or require more time to respond.

Thanks,
Dean
