John,

Looks vary good. Find attached my comments. A couple of editorial. The first one however is if the NH data rises to the level of being mentioned in the abstract. I will leave that up to you. At least consider my comment.

Thanks,
Mark

Subject: Galley proof: review due by 10 AM Wednesday

Hi co-authors,

Attached is our actual galley proof, which is quite similar to what I sent you last week, but with figures and the formatted table included.

Science wants us to return our authors' review promptly. I reviewed the earlier proof and know I have editorial comments. If you have comments on our galleys, please have your comments returned to me by 10 AM eastern time tomorrow, Wednesday, May 19. I will consolidate comments I receive by 10 AM with my comments and return the galley to Science tomorrow.

Thanks!
John

Subject: FW: Your paper for SCIENCE
Importance: High

Hi co-authors,

Attached is quasi-galley proof 1.0. I plan to review it to prepare for actual galley proof, 2.0. If you have the energy, interest and time, I invite you to as well. According to the email from AAAS, we might have access to 2.0 on Tuesday.

If you review this 1.0, I suggest you transcribe your edits to 2.0 when we can access it. Then you can send me your edits of 2.0 to consolidate. I am not sophisticated in combining and comparing PDFs, so I might miss small details in heavily marked reviews you send back to me. So if you find something insidious and important, call it out to me.

I wish you the best in balancing Covid hibernation against personal and societal risk!
John

Subject: Your paper for SCIENCE
Importance: High

Dear Dr. Washington:

Your paper to be published in SCIENCE has been sent to the printer. Because our process for handling author corrections is now electronic, you will receive two files in PDF format: (1) a copyedited manuscript showing where revisions were made (attached here) and (2) a clean set of galley proofs containing any figures and/or tables (to come soon).

Attached is the PDF of the copyedited version of your paper. This file is to assist you in checking and marking the galley proofs. Added text is shown in blue type; deletions are in red with strike-through marks. Queries regarding the manuscript appear in balloons in the right-hand margins. (Note that this file does not contain any figure art; they appear in the galley proofs.)

On 5/19, you should receive an e-mail notice from a representative of our printer (SPI Publisher Services) that the galley proofs of your paper are available for downloading and printing. That e-mail will give instructions on how to access the galleys. If you do not receive this email from SPI, please let me know immediately.

When you receive the e-mail notice from SPI, please print out the galley PDF and compare it with the copyedited version.

FYI: The galley is not the final layout of your paper as it will appear in the magazine. Also, titles to journal references as well as SM-only references are included on the manuscript for checking and are used for online publication; they will be suppressed in the pdf and you will not see them in the galley reference list.

Please respond to all queries, mark all changes directly on the galley pages, and return the corrected galley to me (not to SPI) by e-mail, preferably, or as an e-mailed list of corrections so that I receive it by 5/21, so that your paper can be ready for the next production stage.

NOTE: Please return only the corrected galley to me, not this copyedited file.

Please let me know if you have any questions.

Thank you very much -

Chris Filiatreau
