Hi Andy,

Attached please find my draft slides for my presentation to NJ DEP. If you received a consolidated set from Tim B., my slides here are the same except for adding a note to one graph. As always, I appreciate your comments and thoughts, either directly or thru Tim B.

Thanks!
John

Hi Caroline and Brian,

Strangely I did not get Caroline's email until after 5 PM yesterday, three hours after sending.

Brian, I debated myself on including you on my cc email to Caroline, keeping you apprised vs constantly cluttering your inbox. So I am glad Caroline made the decision.

I did forget that the vegetation data are new and not from my current manuscript. Figures for these data are very general though, expressed as fractions of totals and log scales.

I agree that I am pressing it for 30 minutes. In at least two emails, NJ has stressed that they wanted as much data as possible presented (e.g. 1: "We are hoping that you can present the broadest possible representation of all the data collected and analyzed for;" and e.g. 2: "we are hoping that you can present as much of the data as possible"). I am slotted 30 minutes for talking plus 20 minutes for Q&A, and I plan to be forgiving of myself for talking into some of my Q&A.

I will add Caroline's suggestion and send to Andy G., cc'ing you both to clutter your inbox. I suspect Tim B. plans to send the consolidated slide deck to Andy G., but that's above my paygrade.

Thanks!
John

John and Caroline,

Presentation looks fine but as Caroline said, you'll never get through it if you have to explain anything. Please send to Andy if you are good with what you have. Thank you.

Brian

Hi John,

Very nice slides! This is a lot of material, so you may have trouble getting through all of it in the 30 minutes you've been alloted. In slide 21, you may want to add a legend to the figure to clarify that the orange symbols are ClPFPECAs and the blue symbols are PFCAs (correct?).

I'm copying Brian, because I think he also wanted to look over your slides before the meeting with NJ DEP. At the meeting last week, Brian and I had a chance to check with Andy G. about the level of clearance needed for this presentation. He said it wouldn't be necessary to do clear the presentation in STICS, because this is considered a working meeting among collaborators. Andy did say he'd like to see a copy of the slides though. Do you know if Tim plans to share the combined Lindstrom/Washington/McCord ppt file with Andy?

Thanks,
Caroline

Hey Tim and Andy,

I am attaching my slides that I would like to undergo clearance for the New Jersey presentation. I assume Tim that you plan to do whatever is required to initiate clearance. If/when there are comments from the clearance process, please send the comments to me to address. The slides include my intended presentation as well as supplemental slides afterward for questions or technical discussions. All, or almost all, images and tables are from my manuscript and accompanying Supplemental Information that is undergoing EPA clearance at this time.

I do not intend to add anything to these slides at this point. But I do plan to add animation so that I control the focus of the viewers' attention in the sequence I intend. But this effort should not affect the clearance.

Also, if there are tentative plans for future presentations that include me traveling (e.g., OECA), I would appreciate it if you would please include me early in the scheduling discussion.

Thanks,
John

All,

I have two people being offered Federal positions this week and one Federal perso[Ex. 6 Personal Privacy (PP)]tiring next week. I need to assure that I understand status of all research [Ex. 6 Personal Privacy (PP)] I will not have slides ready by Thursday, and might not by Friday. I can assure slides will be ready by Monday.

Because of use-or-lose time, today is officially my last day this week. I plan to finish my slides on personal time. Following weeks this year also are short for me because I am using use-or-lose.

I will have more than 15 slides, but 50 minutes in sum for (presentation + question) time is fine for me so long as questions end or a moderator ends them.

Thanks
John

Subject: Trenton Briefing Reminder

Andy and I were chatting about the presentation for NJ DEP senior folks. We want to make sure we present highlights of the important stuff. We are thinking it will go something like this:

1. Welcomes & Introductions (15 min)
2. Study background and overview (~12 slides; 20 min; Lindstrom)
3. Signature data presentation and analysis (~15 slides; 30 min presentation; 20 min Q&A discussion; Washington)
4. Break (10 min)
5. New data / effect of water treatment on ClPFPECA (4-5 slides; McCord 10 min presentation; 10 min Q&A)
6. Discussion of priorities for ORD assistance going forwar(Ex. 5 Deliberative Process (DP)) (all; balance of time)

Does this sound reasonable? Is there any other work that needs to be included for the senior folks? Can you all send your slides to Andy to combine into one presentation by COB tomorrow? I am working Friday and will plan to submit for clearance (Watkins, Cascio, Gillespie) on Friday.

Thanks.

Tim
