Subject: Director email for Ohio SAT data release

MaryPat,

OAPQS has uploaded the data on the public website. Please forward to Bob and Paul at OEPA:

bob.hodanbosi@epa.ohio.gov and paul.koval@epa.ohio.gov

I wanted to let you know that the additional School Air Toxics monitoring data conducted at East Elementary School (East Liverpool, OH) and Warren Elementary School (Marietta, OH) has been posted to the website. The Ohio Valley Education Center (Marietta, OH) and Neale Elementary School (Vienna, WV) have the Warren Elementary School data on their page. The website can be found at http://www.epa.gov/schoolair/schools.html. We have also been in contact with school officials to notify them that the data has been released.

I also wanted to take this opportunity to thank you and your staff for all the assistance you have provided throughout this project. We are grateful for your cooperation--this project couldn't have been successful without your help! We look forward to continue working with you as the additional reports are released for the monitoring conducted in East Liverpool and Marietta, OH.

If you have any questions, please give me a call. Thanks.
