d. **Partnership Issue: Re-verifying USDA-implemented practices that have reached lifespan – K. Shenk (10 minutes)**

According to the Chesapeake Bay Program partnership's verification protocols, all jurisdictions are now obligated to verify the continued existence and functioning of practices that have exceeded their CBP-defined lifespan in order to receive credit. States are not able to re-verify USDA-implemented practices because they do not have access to the locational data. USDA would have a difficult time justifying release of its customer location data so that a state agency can potentially visit the farm to verify practices are still in place and working effectively beyond the CBP-defined lifespan. It is unknown to what extent USDA-assisted practices are reaching their CBP-defined lifespan and will be removed from the Bay watershed model if not re-verified.

Potential Path Forward: In order to solve the problem, EPA and USDA propose a pilot analysis in 2019 to quantify the scope and extent of the issue and what the potential workload might be for USDA to carry out a targeted re-verification effort. EPA and USDA evaluate if there is a potential for an agreement with an independent third party to re-verify priority practices, looking at workload, who can verify, and who has or can have access to USDA practice data by location, and how to pay for this work.

Timing: Any solution to this problem will not be ready to implement in time for the CBP's 2018 annual progress assessment, which will be completed this month.
