Wayne –

Thanks for the update. You had been sending us Steve's daily reports up until June 18 – if you have more after that time, I would really appreciate receiving them.

So what was the outcome of last Wednesday's meeting with Angeles, Tina and Phil?

Eva

Wayne,

I don't know if you had a chance to look through the weekly reports yet, so here are some highlights from the last two reports:

EBR well UWBZ34, located on the SW corner, was re-drilled. There's no reason given for having to re-drill it; this well had some strong indications of LNAPL when they drilled it the first time.

The 7/1 report shows LNAPL in several CZ and UWBZ wells that are located on the perimeter of the respective treatment zones. UWBZ26 on the west side had 20+ ft of NAPL on 7/5 and 7/6.

LSZ14, which is on the NE corner of the site next to Sossaman Rd., had 21-ft of NAPL on 7/7.

Well W11 had 7-ft of LNAPL on 7/8

There are still 16 eductors that haven't been removed, so no information on those wells re NAPL
