NOV 08 2010

In regards to the Docket ID. NO. EPA-R03-OW-2010-0736 I oppose implementing the proposed Chesapeake Bay TMDL limits because, N.Y. already has the cleanest water in the watershed & effective pollution control programs.

The proposed additional limitations will be an unfair burden on N.Y. agriculture, municipal services, taxpayers, businesses & residents.

The EPA model is flawed, not proven and not suitable for being the basis for the proposed limitations

Most specifically, the EPA should incorporate the model revisions recommended by the O.E.C. in their Watershed Implementation Plan.
