Subject: FW: URGENT Request - for Upcoming Hearing - Due Friday 8/23
Importance: High

Hi Everyone,

We need site status updates for the sites listed in the attached spreadsheet. Please work with your staff to have these sent to me and Rusty by COB August 21st. From Dana's message, it sounds like we may done a round of updates for sites in these members districts earlier in the year. I know many folks are out this week. Fortunately the deadline is next Friday.
Thanks
John

Subject: URGENT Request - for Upcoming Hearing - Due Friday 8/23

All,

On behalf of Peter Wright, I'm sending a request for additional information in preparation for Administrator Wheeler's hearing on Sept 19th before the House Science, Space, and Technology Committee. This is a general oversight hearing.

Peter would like the Administrator to have, in *addition* to the site-specific and issue-specific factsheets that you've provided to OCIR, an updated status on each of the active (e.g., current on the NPL, SAA, or recently proposed) sites in each of the committee member districts. You may recall that we made a similar request earlier this year for "blurbs" on each site in preparation for Barry Breen's hearing before the House T&I committee (a hearing that was cancelled).

Attached you will find a spreadsheet that identifies the sites that SEMS shows are within each member district. They are broken down by region. Some members do not have any sites meeting the criteria of "current" (i.e., they are deleted) and Region 1 has no members on the committee.

BY 3PM on FRIDAY, AUGUST 23rd - Please provide a document containing the status of each of these sites, using the attached Word document as a template.

Please send these factsheets directly to Melanie Keller, OLEM's Congressional Liaison. Please CC Greg Gervais, Mary Cooke, Jim Woolford, and me.

Thank you - Dana
