Subject: Regarding the February 25-26, 2020 TSCA SACC Peer Review Meeting- Candidate Status

Hello and Good Afternoon,

Thank you again for your interest in being considered as a candidate to serve as an ad hoc expert reviewer for the February 25-26, 2020 Science Advisory Committee on Chemicals (SACC) peer review meeting, reviewing EPA's **Draft Risk Evaluation for Carbon Tetrachloride.** Although you were not selected to serve on the Committee this session, you may be considered to participate for future meetings and will be contacted directly to obtain your availability and interest.

You are welcome to submit written comments on the issues under consideration for the Carbon Tetrachloride meeting. If you have written comments you would like to submit, please send them to me by February 19th. I will forward your written comments to the attention of the SACC and place them in the public docket. In addition, the meeting is open to the public and you may, on request, present oral comments before the SACC.

The review documents and public comments that are available electronically are posted in the public docket at the following address:

https://www.regulations.gov/docket?D=EPA-HQ-OPPT-2019-0499.

Thank you again for your time and consideration.

Tamue

Subject: IMPORTANT -- EPA SACC -- Are You Available and Interested in February and March peer review

You have been identified as a possible candidate to serve as to serve as ad hoc expert for one or both upcoming TSCA SACC meetings, presently scheduled for:

- February 24-28, 2020
- March 23-27, 2020

Please indicate your **interest and availability** to participate as ad hoc member of the TSCA SACC for either or both meetings. Each meeting will focus on scientific issues associated with draft risk evaluations for two of the following chemicals (as yet not confirmed which chemicals for which date):

- Perchloroethylene
- Trichloroethylene
- Carbon Tetrachloride
- Asbestos

You may have received prior communications from my colleague Dr. Sharlene Matten (who is presently on annual leave), thus this email may be redundant, but I am now working to update our team records and arrange for peer reviewers (based on expertise needed) for the two meetings.

The Agency will issue a Federal Register Notice mid-January specifying which chemicals will be the subject of the February meeting. The remaining two chemicals will be the subject of the March meeting.

- Please provide any updates to your **Confidential Financial Disclosure** form (e.g., client list and asset portfolio). If there are no changes, please indicate (update and send form previously submitted).

- Please answer the **four questions** concerning impartiality with respect to your involvement with four chemicals noted above (see attached table – MS Word file – with the questions for all four chemicals. Provide answers for all, however, if you submitted answers for a chemical previously, enter "submitted" in spaces provided for the corresponding chemical).

- In addition, please update your **Biosketch** using previous form submitted or the attached template (or please indicate no changes if your previous submission is unchanged).

- Also, send an updated current **CV/resume** (or please indicate no changes if your previous or recent submission is unchanged).

We would appreciate a response prior **as soon as possible**. This will help us make a selection decision in early January to complete panels for both February and March.

Please send responses to the CFD-SRD@epa.gov (this is especially important if you are updating your Confidential Financial Disclosure form … and if so, do not cc any other email address).

Please contact me if you have any questions (see contact information below).

Best Regards,

Todd Peterson, PhD
