Jon,

I left you a voicemail which you can disregard. I withdraw my request. We will do our best with what is publicly available.

Ken – Please pardon the bluntness of this: If you mean ODFW, you need to say "ODFW" or spell out the entire name – Oregon Department of Fish and Wildlife. The acronym "OFWS" refers to the Oregon field office of the USFWS. ODFW folks in the distribution list are going to ignore this email because of the acronym you used.

Also, in the future please try to give folks a bit more lead notice on your request. They're going to need to figure out how to fit your request into their existing priorities, which in their eyes may be more important than your request.

Jon

Thanks Michael,

I'm in close contact with Bob on this project. What I need for our model however is a letter from OFWS addressing our questions to the extent possible. The message from Jeremy Buck at USFWS suggested that OFWS would be the best contact for certain pieces of information. Is there someone else at OFWS I should work with on this? We are on a pretty tight deadline.

Thanks!

Hi all – Jon Germond has been forwarding these communiques on to me, but a better resource for this is Bob Schwarz who is the current Project Manager for this site. Bob's phone is 503-229-5128.

Hi Jon,

Just checking in on the status of a letter from Oregon FWS providing information for the EPA NPL listing package for the Bradford Island site. We are trying to get the package to HQ by the end of next week. If we could get a letter from you on FWS letterhead by early next week, that would be fantastic. The Tribe and USFWS are working on theirs – hope to have them by the end of this week. Thanks again for all the help on this! Ken

Kalysta, Martin, & John – I've received recent inquiries for information about F&W in Bradford Island area from both Ken Marcy (EPA) & Mike Greenburg (DEQ). Hopefully, you can answer the questions below that are related to your disciplines. Thanks!

Subject: fish and sensitive habitat information needed for EPA NPL listing of Bradford Island

Hi Jon,

I just left you a voicemail on this. In response to requests from Oregon DEQ, Washington Ecology and the Yakima Nation, EPA Region 10 is moving forward with the listing of the Bradford Island site (Bonneville) on the National Priorities List. In order for EPA to complete our ranking package, we need formal information from various agencies regarding threatened and endangered species, fishing, and sensitive habitat information for the "zone of contamination" (see attached figure), and areas outside and downstream of the zone of contamination . Here's a more complete list of what we need:

Sensitive environments:

- Critical habitat for Federal or State designated Endangered or Threatened species. Specify which species including scientific name and listing status (Fed or State, Endangered or Threatened).
- Habitat known to be used by Federal or State Endangered or Threatened species. Specify which species including scientific name and listing status (Fed or State, Endangered or Threatened).
- Spawning areas critical for the maintenance of fish/shellfish species.
- Migratory pathway and/or feeding areas critical for the maintenance of anadromous fish species within the river.

Human Food Chain Organisms:

- Indicate whether recreational or subsistence fishing or shellfish harvesting occurs, including the type of fish/shellfish caught or sought. Please specifically state the caught/sought species are for *human consumption*. If any fish catch or harvest information is available for this area, please provide it (I realize this is unlikely, but asking just in case).
- If fishing/harvesting does not occur within the Zone of Actual Contamination due to a perception of contamination, please also state that and give details.

We need the information in the form of a letter on agency letterhead. This is a big ask on fairly quick timeframe – I appreciate any assistance you can provide. Please give me a call if you want to discuss further. Thanks! Ken
