Hi Jess,

I apologize, my last email should have mentioned that some of the non-significant facilities have been removed from the input deck for being out of the watershed, discharging to groundwater, or have terminated permits.

Thanks,

Cassie

Hi Jess,

This is a draft input deck to assist with our conversation tomorrow. The facilities and nutrient concentrations are the same as the final 2025 input deck. The flow data is now the average over the past three years instead of the design flow for the permitted facility. This should not be added to CAST website for the public to view since we have not committed to this yet.

Thanks,

Cassie

Hi Cassie,

I received the new WIP wastewater input data from Jeff Sweeney yesterday. I am working on getting that into CAST for your review, but I wanted to verify that the ONLY change is the flow data. Please confirm and I will have revised WIP available for your review today.

Thanks,

Jess
