Ok. We will talk here on the agreed testing for August. Got it.

Ivan

Subject: Clarification of Stage 2 DBP Sampling Locations - Polacca Water System

We received the Stage 2 DBP sampling data for water samples collected on September 10, 2014. I have the following questions:

Prior to the start of the Stage 2 DBP sampling, it was agreed between the Polacca water system and myself that the Stage 2 DBP samples would be collected at the following locations in August of every year. Please remember that the Stage 2 DBP Rule is based on a locational running annual average. This means the same location is sampled every year for DBPs. It was also agreed that the sampling would take place in August of every year.

Agreed-upon sampling locations:

DS001 (Lower Polacca Distribution System): Polacca Circle Inn – Kitchen Sink
DS001 (Lower Polacca Distribution System): Rose Namoki Residence
DS002 (Distribution system for the Upper Mesa): Ponsi Hall – Men's Restroom
DS002 (Distribution system for the Upper Mesa): Walpi Elderly Center – Kitchen Sink

September 10, 2014 sampling locations:

Sharon Grover's Residence
Angie Joseph's Residence
Hopi Health Care Maintenance
Mary Qutswisiwma

Could you please let us know of the four September 2014 sampling locations, which are located on the Lower Polacca Distribution System and which are located on the Distribution System for the Upper Mesa? That will help us determine which distribution system to apply the data.

Also, since the September 2014 sampling locations are different than what was agreed to, do you want to use the 2014 sampling locations as the locations that you will be sampling from now on IF these four sites represent the two distribution system? We can talk about this after you let me know which distribution system each location represents. We can also discuss whether you want to collect the samples in August of every year (as agreed to) or September of every year (as actually sampled).

Please contact me if you have any questions.
