c̄ Rafael Espasas ESB. Int env.
c̄ ANDA (non-profit law firm)

Salinas 6/21/11

c̄ Ruth Santiago

① Pozo Coco III – "well" – adjacent to Patillas irrigation canal – adjacent to possible EOB ambient monitoring trailer

c̄ Humberto Martin

c̄ FASE (southeast affirmative front – env./cultural educational non-profit)

wants AES to provide MSDS with all shipments of aggregate (has not been able to get MSDS)

Parque Gabriella II – 30 ac – aggregate used as foundation and to line stormwater retention pond

– crumbly!

aggregate applied to concrete fence adjacent to irrigation canal (drains to Nigua River / Salinas Bay)

c̄ Carlos Lago – Env. Dialog Comm (non-profit – client of Ruth)

(note - all references to ash ~~are~~ relate to aggregate)

Ruth concerned also c̄ fugitive dust from transport and construction mgmt on sites.

@ Rafael aggregate sold for $0.15/T, sometimes c̄ free shipping - unfair competition vs. C/D demolition waste reuse - proposal by various env groups to convert AES to natl. gas

→ Ruth will send 9/10 analytical results for site, as well as 2005 AES paraguay presentation

@ Humberto - concern about silica content (OSHA hazard) - also about use in ramps and other heavy traffic areas (says not supposed to be used)

② Porto ~~Fino~~ Bello Plaza - proposed site for shopping center - ash laid down for fill to raise level above sea level
└ ~~~18'~~ depth - according to construction
~6' - 30'
worker and local activist

@ Ruth - ash used in entire area (4 shopping centers)

Ash runoff to storm sewer at edge of development

(3) Marbella - Housing built on ash - raised 10-15' above street level

Ash pile on proposed road / channel discharges to Salinas Bay (Rincon Bay)

(4) Valles de Salinas - stormwater drainage channel

(5) Evelymar Development - unpermitted unnamed channel

Pozo La Margarita Salinas - next to housing (public) and west of Porto Fino / Bello shopping Cntr.

near wetlands & aggregate base road

Pozo San Felipe - Rt 3 / Rt 706 Rancho Guayama Sector

(on the way, Rt 705, ash used as fill to bring road sides to level)

(6) Dueno - Santa Paula Oil - site for gas station (not built) ~10' coal ash above road level

Rt 706 - Rancho Guayama access rd. (between Rt 3 and Rt 712) built on ash

In Julia Sector - raised area
~20' built on aggregate

(7) Pfizer Guayama - industrial well

AES "access road" construction - @ Ruth
far more expensive (wider, higher) than appropriate for stated end use - Next to Guamani River bed - now dry -

Allan Dyer - Plant mgr.
AES
arrived with staff to question visit on "private land" - said plans exist for area, which was described as road construction to reach boiler water wells. Dyer said; "why not?" when I asked why so wide/extensive. Dyer asked us to leave and we did so.

(8) Las Recreos Plaza - unbuilt access road - possible asbestos dump site - Flamps also - next to Guamani River

(9) Arroyo Town Center – existing supermarket and planned construction all underlain by aggregate. Pozo Urbano I nearby – and Pozo Sammy and Pozo de Texaco

Eta Sigma Alpha Inc

(10) Building site (unbuilt) next to ~~Fraternidad~~ Bldg. on access road to Cheriopoli Punta Guilarte beach – aggregate built up ~ 9'
– wetland/lagoon nearby –

(11) Rt 3 Km 128.4
apparent aggregate dump site ~ 1500' in from road – near Pozo Estacion de PZ Texaco, Arroyo
~~@ km~~ @ Km 128.7
