1. OAR - SAN 5869: (Tier '2') MATS Considering Costs in Appropriate and Necessary Finding Action Document Link->

External Abstract: The U.S. Supreme Court remanded the MATS rule to the DC Circuit Court after finding that the EPA had not properly considered cost as part of the "Appropriate and Necessary" (A&N) Finding that was required under CAA section 112(n)(1)(A). The EPA will issue a notice that

details how the Agency explicitly considered cost as part of the A&N Finding. *No Workgroup Specified*

2. OAR - SAN 5870: (Tier '2') Classifications and Implementation Rule for the 2015 Ozone NAAQS - Action Document Link->

External Abstract: This proposed rule will address a range of implementation requirements for the 2015 National Ambient Air Quality Standards (NAAQS) for ozone, including the nonattainment area classification system, and the timing of State Implementation Plan (SIP) submissions. It will also discuss and outline relevant guidance on meeting the Clean Air Act's requirements pertaining to attainment demonstrations, reasonable further progress, reasonably available control measures, nonattainment new source review, and emission inventories. Other issues addressed in this proposed rule are the potential revocation of the 2008 ozone NAAQS and anti-backsliding requirements that would apply if the 2008 NAAQS are revoked. The items covered in this rulemaking have been covered in similar rulemakings for two prior 8-hour ozone NAAQS (1997 and 2008). *No Workgroup Specified*

3. OAR - SAN 5873: (Tier '3') SNAP Status Change Rule #2 - Action Document Link->

External Abstract: This action would list a number of substances as acceptable, subject to use restrictions, where alternatives may be used safely in accordance with the proposed restrictions. This action also would list as unacceptable or modify the listing status for certain alternatives from acceptable to unacceptable or acceptable, subject to use restrictions where other alternatives are available or potentially available that pose lower overall risk to human health and the environment. Affected industrial sectors under consideration include refrigeration and air conditioning, foam blowing, and fire suppression and explosion protection. *No Workgroup Specified*
