↳ production

IU & Attleboro POTW x244 (Diane)

Metalor - previous metal powder & shake using ammonia
NH_3 - plant changes in attleboro → aerobic process
that can't treat NH_3, BEAR told they need to cease discharge.

(IU) new permit 12/11 4,000 - 5,000 ppm ave conc.
No NH_3 limits - mon only ~~30~~ flow 10,000 gal/day (15,000)
permit #026 permit limit 5 year permit ~~(15)~~

Paul Kennedy @ treatment

Starters discussions a few weeks ago - feel relationship is good
15 gal/min → for 2 shifts got 3rd operation & were asked
asked to Δ 10 gal/min for 24 hrs
didn't help @ treatment plant.
total N levels much lower in permit (permit has
→ ~~[illegible]~~ seasonal limit for NH_3 - nitrogen
& TN)

? need to call plant & get info on treatment plant changes &
other backgrounds
- talk to J. Canzano (have on call w/ plant?)
